Howard Brown

RESURVEY OF THE MARSHALL ISLANDS ATOLLS

SYMBOL: BME:HCB

This afternoon, following a discussion with Dr. Dunham, I telephoned Mr. Saitta, Bureau of Ships, relative to the status of the original of the copy of the proposal provided the Division relative to a resurvey of the Marshall Islands atolls by NRDL. He informed me that the original had been sent to the Chief of Naval Operations for concurrence and the provision of logistic support, and that upon receipt of the CNO's concurrence and assurance that logistic support would be forthcoming, the Bureau of Ships would at that juncture make a specific proposal to the Division of Biology and Medicine.

I suggested to Mr. Saitta that, in view of other related work to be performed in the area or presently going on, such as Donaldson's work and the other proposal from NRDL to make laboratory studies of animals collected in the area, it would be well if the interested parties were to get together and coordinate their efforts. He was favorably disposed to this and agreed that upon receipt of favorable word from the CNO he would notify this office in order that a meeting could be arranged, and would withhold submitting a formal proposal to the Division pending the outcome of such a meeting.
